

University of California, San Diego
Department of Mathematics

Instructions

1. Write your *Name*, *PID*, *Section*, and *Exam Version* on the front of your Blue Book.
2. No calculators or other electronic devices are allowed during this exam.
3. You may use one page of notes, but no books or other assistance during this exam.
4. Read each question carefully, and answer each question completely.
5. Write your solutions clearly in your Blue Book.
 - (a) Carefully indicate the number and letter of each question and question part.
 - (b) Present your answers in the same order they appear in the exam.
 - (c) Start each problem on a new page.
6. Show all of your work. No credit will be given for unsupported answers, even if correct.
7. Turn in your exam paper with your Blue Book.

0. (1 point) Carefully read and complete the instructions at the top of this exam sheet and any additional instructions written on the chalkboard during the exam.

1. (9 points) Find the area of the polar curve $r = \cos(3\theta)$ for $-\frac{\pi}{6} \leq \theta \leq \frac{\pi}{6}$.

2. (10 points) Evaluate the indefinite integral. You may leave your answer in exponential form.

$$\int \sin(3x) \cos(x) dx$$

3. (10 points) Evaluate the indefinite integral using the method of partial fractions.

$$\int \frac{x}{(x-1)^2(x^2+1)} dx$$

4. (10 points) Evaluate the indefinite integral.

$$\int \frac{1}{(9-x^2)^{3/2}} dx$$

5. (10 points) Evaluate the following improper integral:

$$\int_e^\infty \frac{1}{x(\ln x)^2} dx.$$

(This exam is worth 50 points.)
