### Part I Back Ground Material

---

<b>1</b>	<b>Introduction / User Guide</b> .....	3
1.1	Topology beginnings .....	3
1.2	A Better Integral and an Introduction to Measure Theory ....	3
<b>2</b>	<b>Set Operations</b> .....	7
2.1	Exercises .....	10
<b>3</b>	<b>The Real and Complex Numbers</b> .....	11
3.1	The Real Numbers .....	12
3.1.1	The Decimal Representation of a Real Number .....	16
3.2	The Complex Numbers .....	19
3.3	Exercises .....	20
<b>4</b>	<b>Limits and Sums</b> .....	21
4.1	Limsups, Liminfs and Extended Limits .....	21
4.2	Sums of positive functions .....	24
4.3	Sums of complex functions .....	28
4.4	Iterated sums and the Fubini and Tonelli Theorems.....	32
4.5	Exercises .....	34
4.5.1	Limit Problems .....	34
4.5.2	Dominated Convergence Theorem Problems .....	35
<b>5</b>	<b><math>\ell^p</math> – spaces, Minkowski and Holder Inequalities</b> .....	39
5.1	Exercises .....	44

---

### Part II Metric and Banach Space Basics

---

<b>6</b>	<b>Metric Spaces</b> .....	49
6.1	Continuity .....	51
6.2	Completeness in Metric Spaces .....	53
6.3	Supplementary Remarks .....	55
6.3.1	Word of Caution .....	55
6.3.2	Riemannian Metrics .....	56
6.4	Exercises .....	57
<b>7</b>	<b>Banach Spaces</b> .....	61
7.1	Examples .....	61
7.2	Bounded Linear Operators Basics .....	64
7.3	General Sums in Banach Spaces .....	68
7.4	Inverting Elements in $L(X)$ .....	70
7.5	Hahn Banach Theorem .....	71
7.6	Exercises .....	75
7.6.1	Hahn-Banach Theorem Problems .....	77
<b>8</b>	<b>The Riemann Integral</b> .....	79
8.1	The Fundamental Theorem of Calculus .....	83
8.2	Integral Operators as Examples of Bounded Operators .....	85
8.3	Linear Ordinary Differential Equations .....	87
8.4	Classical Weierstrass Approximation Theorem .....	91
8.5	Iterated Integrals .....	96
8.6	Exercises .....	99
<b>9</b>	<b>Hölder Spaces as Banach Spaces</b> .....	103
9.1	Exercises .....	107

---

### Part III Topological Spaces: I

---

<b>10</b>	<b>Topological Space Basics</b> .....	113
10.1	Constructing Topologies and Checking Continuity .....	114
10.2	Product Spaces I .....	120
10.3	Closure operations .....	123
10.4	Countability Axioms .....	125
10.5	Connectedness .....	127
10.6	Exercises .....	130
10.6.1	General Topological Space Problems .....	130
10.6.2	Connectedness Problems .....	131
10.6.3	Metric Spaces as Topological Spaces .....	132

<b>11</b>	<b>Compactness</b> .....	135
11.1	Metric Space Compactness Criteria .....	136
11.2	Compact Operators .....	142
11.3	Local and $\sigma$ – Compactness .....	144
11.4	Function Space Compactness Criteria .....	146
11.5	Tychonoff’s Theorem .....	149
11.6	Exercises .....	152
11.6.1	Ascoli-Arzelà Theorem Problems .....	153
11.6.2	Tychonoff’s Theorem Problem .....	154

---

### Part IV Topological Spaces II

---

<b>12</b>	<b>Locally Compact Hausdorff Spaces</b> .....	157
12.1	Locally compact form of Urysohn’s Metrization Theorem .....	161
12.2	Partitions of Unity .....	164
12.3	$C_0(X)$ and the Alexanderov Compactification .....	169
12.4	More on Separation Axioms: Normal Spaces .....	171
12.5	Stone-Weierstrass Theorem .....	174
12.6	Locally Compact Version of Stone-Weierstrass Theorem .....	178
12.7	Exercises .....	179
<b>13</b>	<b>Baire Category Theorem</b> .....	183
13.1	Metric Space Baire Category Theorem .....	183
13.2	Locally Compact Hausdorff Space Baire Category Theorem .....	184
13.3	Exercises .....	190
<b>14</b>	<b>Topological Vector Spaces</b> .....	191
14.1	Basic Facts .....	191
14.2	The Structure of Finite Dimensional Topological Vector Spaces .....	193
14.3	Metrizable Topological Vector Spaces .....	195

---

### Part V Calculus and Ordinary Differential Equations in Banach Spaces

---

<b>15</b>	<b>Ordinary Differential Equations in a Banach Space</b> .....	203
15.1	Examples .....	203
15.2	Uniqueness Theorem and Continuous Dependence on Initial Data .....	205
15.3	Local Existence (Non-Linear ODE) .....	207
15.4	Global Properties .....	210
15.5	Semi-Group Properties of time independent flows .....	216
15.6	Exercises .....	218

**16 Banach Space Calculus** . . . . . 221

16.1 The Differential . . . . . 221

16.2 Product and Chain Rules . . . . . 222

16.3 Partial Derivatives . . . . . 225

16.4 Smooth Dependence of ODE's on Initial Conditions . . . . . 226

16.5 Higher Order Derivatives . . . . . 229

16.6 Contraction Mapping Principle . . . . . 233

16.7 Inverse and Implicit Function Theorems . . . . . 235

16.8 More on the Inverse Function Theorem . . . . . 239

16.8.1 Alternate construction of  $g$  . . . . . 243

16.9 Applications . . . . . 243

16.10 Exercises . . . . . 245

---

**Part VI Lebesgue Integration Theory**

---

**17 Introduction: What are measures and why “measurable” sets** . . . . . 251

17.1 The problem with Lebesgue “measure” . . . . . 252

**18 Measurability** . . . . . 257

18.1 Algebras and  $\sigma$  – Algebras . . . . . 257

18.2 Measurable Functions . . . . . 262

18.2.1 More general pointwise limits . . . . . 269

18.3  $\sigma$  – Function Algebras . . . . . 269

18.4 Product  $\sigma$  – Algebras . . . . . 276

18.4.1 Factoring of Measurable Maps . . . . . 279

18.5 Exercises . . . . . 279

**19 Measures and Integration** . . . . . 281

19.1 Example of Measures . . . . . 284

19.2 Integrals of Simple functions . . . . . 286

19.3 Integrals of positive functions . . . . . 287

19.4 Integrals of Complex Valued Functions . . . . . 295

19.5 Measurability on Complete Measure Spaces . . . . . 303

19.6 Comparison of the Lebesgue and the Riemann Integral . . . . . 304

19.7 Determining Classes for Measures . . . . . 307

19.8 Appendix: Bochner Integral . . . . . 310

19.9 Bochner Integrals (NEEDS WORK) . . . . . 314

19.9.1 Bochner Integral Problems From Folland . . . . . 314

19.10 Exercises . . . . . 316

**20 Fubini’s Theorem** . . . . . 319

20.1 Fubini-Tonelli’s Theorem and Product Measure . . . . . 320

20.1.1 Application: More proofs of the Weierstrass Approximation Theorem <sup>§ 8.27</sup> . . . . . 327

20.2 Lebesgue measure on  $\mathbb{R}^d$  . . . . . 330

20.3 Polar Coordinates and Surface Measure . . . . . 333

20.4 Exercises . . . . . 337

**21  $L^p$ -spaces** . . . . . 339

21.1 Jensen’s Inequality . . . . . 343

21.2 Modes of Convergence . . . . . 346

21.3 Completeness of  $L^p$  – spaces . . . . . 350

21.3.1 Summary: . . . . . 354

21.4 Converse of Hölder’s Inequality . . . . . 355

21.5 Uniform Integrability . . . . . 361

21.6 Exercises . . . . . 367

**22 Approximation Theorems and Convolutions** . . . . . 369

22.1 Convolution and Young’s Inequalities . . . . . 374

22.1.1 Smooth Partitions of Unity . . . . . 383

22.2 Exercises . . . . . 384

---

**Part VII Construction of Measures**

---

**23 Uniqueness and Regularity of Measures** . . . . . 389

23.1 Monotone Class and  $\pi - \lambda$  Theorems . . . . . 389

23.1.1 Some other proofs of previously proved theorems . . . . . 392

23.2 Regularity of Measures . . . . . 394

**24 Daniell – Stone Construction of Measures** . . . . . 401

24.1 Finitely Additive Measures and Associated Integrals . . . . . 401

24.1.1 Integrals associated to finitely additive measures . . . . . 403

24.2 The Daniell-Stone Construction Theorem . . . . . 406

24.3 Extensions of premeasures to measures I . . . . . 410

24.4 Riesz Representation Theorem . . . . . 414

24.4.1 The Riemann – Stieltjes – Lebesgue Integral . . . . . 418

24.5 Metric space regularity results revisited . . . . . 421

24.6 Measure on Products of Metric spaces . . . . . 422

24.7 Measures on general infinite product spaces . . . . . 424

24.8 Extensions of premeasures to measures II . . . . . 426

24.8.1 “Radon” measures on  $(\mathbb{R}, \mathcal{B}_{\mathbb{R}})$  Revisited <sup>§ 24.35</sup> . . . . . 428

24.9 Supplement: Generalizations of Theorem 24.35 to  $\mathbb{R}^n$  . . . . . 429

24.10 Exercises . . . . . 433

24.10.1 The Laws of Large Number Exercises . . . . . 434

<b>25 Daniell Integral Proofs</b> .....	437
25.1 Extension of Integrals .....	438
25.2 The Structure of $L^1(I)$ .....	446
25.3 Relationship to Measure Theory .....	447
<b>26 Carathéodory's Method of Constructing Measures</b> .....	453
26.1 Outer Measures .....	453
26.2 Carathéodory's Construction Theorem .....	455
26.3 Regularity results revisited .....	459
<b>27 Radon Measures and <math>C_0(X)^*</math></b> .....	463
27.1 More Regularity Results .....	466
27.2 The Riesz Representation Theorem .....	469
27.2.1 Another proof of Theorem 27.11 .....	473
27.3 The dual of $C_0(X)$ .....	473
27.4 Special case of Riesz Theorem on $[0, 1]$ .....	477
27.5 Applications .....	478
27.6 The General Riesz Representation by Daniell Integrals .....	481
27.7 Regularity Results .....	483
27.8 Old Stuff .....	489
27.8.1 Construction of measures on a simple product space. . .	489

---

## Part VIII Hilbert Spaces and Spectral Theory of Compact Operators

---

<b>28 Hilbert Spaces</b> .....	495
28.1 Hilbert Spaces Basics .....	495
28.2 Hilbert Space Basis .....	504
28.3 Fourier Series Considerations .....	507
28.4 Weak Convergence .....	510
28.5 Supplement 1: Converse of the Parallelogram Law .....	514
28.6 Supplement 2. Non-complete inner product spaces .....	516
28.7 Supplement 3: Conditional Expectation .....	518
28.8 Exercises .....	521
28.9 Fourier Series Exercises .....	524
28.10 Dirichlet Problems on $D$ .....	528
<b>29 Polar Decomposition of an Operator</b> .....	533
<b>30 Compact Operators</b> .....	541
30.1 Hilbert Schmidt and Trace Class Operators .....	543
30.2 The Spectral Theorem for Self Adjoint Compact Operators ..	548
30.3 Structure of Compact Operators .....	551
30.4 Trace Class Operators .....	551

30.5 Fredholm Operators .....	554
30.6 Tensor Product Spaces .....	560
<b>31 Spectral Theorem for Self-Adjoint Operators</b> .....	565
31.1 $*$ -Algebras (over complexes) .....	572
31.1.1 Exercises .....	576
31.2 The Spectral Theorem .....	578
31.2.1 Problems on the Spectral Theorem (Multiplication Operator Form) .....	585
31.3 Spectral Theory in Hilbert Space .....	588
31.3.1 Multiplication operators .....	591
31.3.2 Spectrum .....	593
31.3.3 Spectral Theorem and the Functional Calculus .....	595
31.3.4 Weak integrals of operator valued functions .....	596
31.3.5 Fourier Transform, Proof of Theorem 31.83 .....	598
31.3.6 Proof of Theorem 31.83 .....	602
31.3.7 Extensions to commuting self-adjoint operators .....	603
31.3.8 Exercises .....	611
31.4 Unbounded Self-Adjoint Operators .....	612
31.4.1 Affiliated operators .....	622
31.5 Bounded Self - Adjoint Operators .....	623
31.6 The Structure of Abelian Banach Algebras .....	628

---

## Part IX Synthesis of Integral and Differential Calculus

---

<b>32 Complex Measures, Radon-Nikodym Theorem and the Dual of <math>L^p</math></b> .....	637
32.1 Radon-Nikodym Theorem I .....	638
32.2 Signed Measures .....	644
32.2.1 Hahn Decomposition Theorem .....	645
32.2.2 Jordan Decomposition .....	646
32.3 Complex Measures II .....	650
32.4 Absolute Continuity on an Algebra .....	654
32.5 Dual Spaces and the Complex Riesz Theorem .....	656
32.5.1 Reflexivity .....	660
32.6 Exercises .....	661
<b>33 Lebesgue Differentiation and the Fundamental Theorem of Calculus</b> .....	663
33.1 A Covering Lemma and Averaging Operators .....	664
33.2 Maximal Functions .....	665
33.3 Lebesgue Set .....	667
33.4 The Fundamental Theorem of Calculus .....	670
33.5 Alternative method to the Fundamental Theorem of Calculus .	681

33.5.1	Proof of Theorem <sup>t.31.29</sup> <sub>33.29</sub> . . . . .	683
33.6	Examples: . . . . .	683
33.7	Exercises . . . . .	684
<b>34</b>	<b>The Change of Variable Theorem</b> . . . . .	687
34.1	Appendix: Other Approaches to proving Theorem <sup>t.32.1</sup> <sub>34.1</sub> . . . . .	692
34.2	Sard's Theorem . . . . .	694
<b>35</b>	<b>Surfaces, Surface Integrals and Integration by Parts</b> . . . . .	699
35.1	Surface Integrals . . . . .	701
35.2	More spherical coordinates . . . . .	711
35.3	$n$ – dimensional manifolds with boundaries . . . . .	715
35.4	Divergence Theorem . . . . .	718
35.5	The proof of the Divergence Theorem . . . . .	722
35.5.1	The Proof of the Divergence Theorem <sup>t.33.23</sup> <sub>35.23</sub> . . . . .	724
35.5.2	Extensions of the Divergence Theorem to Lipschitz domains . . . . .	726
35.6	Application to Holomorphic functions . . . . .	727
35.7	Dirichlet Problems on $D$ . . . . .	730
35.7.1	Appendix: More Proofs of Proposition <sup>p.33.32</sup> <sub>35.32</sub> . . . . .	734
35.8	Exercises . . . . .	736

---

## Part X Miracle Properties of Banach Spaces

---

<b>36</b>	<b>Two Fundamental Principles of Banach Spaces</b> . . . . .	741
36.1	The Open Mapping Theorem . . . . .	741
36.1.1	Applications to Fourier Series . . . . .	747
36.2	Banach – Alaoglu's Theorem . . . . .	750
36.2.1	Weak and Strong Topologies . . . . .	750
36.2.2	Weak Convergence Results . . . . .	752
36.3	Supplement: Quotient spaces, adjoints, and more reflexivity . . . . .	756
36.4	Exercises . . . . .	761
36.4.1	More Examples of Banach Spaces . . . . .	761
36.4.2	Hahn-Banach Theorem Problems . . . . .	761
36.4.3	Baire Category Result Problems . . . . .	761
36.4.4	Weak Topology and Convergence Problems . . . . .	762
<b>37</b>	<b>Weak and Strong Derivatives</b> . . . . .	763
37.1	Basic Definitions and Properties . . . . .	763
37.2	The connection of Weak and pointwise derivatives . . . . .	777
37.3	Exercises . . . . .	783

---

## Part XI Complex Variable Theory

---

<b>38</b>	<b>Complex Differentiable Functions</b> . . . . .	789
38.1	Basic Facts About Complex Numbers . . . . .	789
38.2	The complex derivative . . . . .	790
38.3	Contour integrals . . . . .	796
38.4	Weak characterizations of $H(\Omega)$ . . . . .	803
38.5	Summary of Results . . . . .	807
38.6	Exercises . . . . .	808
38.7	Problems from Rudin . . . . .	811
<b>39</b>	<b>More Complex Variables: The Index</b> . . . . .	813
39.1	Unique Lifting Theorem . . . . .	814
39.2	Path Lifting Property . . . . .	814
39.2.1	<b>Alternate Method</b> . . . . .	816
<b>40</b>	<b>Residue Theorem</b> . . . . .	825
40.1	Residue Theorem . . . . .	825
40.2	Open Mapping Theorem . . . . .	828
40.3	Applications of Residue Theorem . . . . .	829
40.3.1	Applications; fundamental theory of Algebra. . . . .	830
40.4	Isolated Singularity Theory . . . . .	831
<b>41</b>	<b>Conformal Equivalence</b> . . . . .	835
<b>42</b>	<b>Find All Conformal Homeomorphisms of <math>V \rightarrow U</math></b> . . . . .	839
42.1	“Sketch of Proof of Riemann Mapping” Theorem . . . . .	840
42.1.1	Normal Families . . . . .	840
<b>43</b>	<b>Littlewood Payley Theory</b> . . . . .	849
43.0.2	Applications . . . . .	852

---

## Part XII The Fourier Transform and Generalized Functions

---

<b>44</b>	<b>Fourier Transform</b> . . . . .	859
44.1	Fourier Transform . . . . .	860
44.2	Schwartz Test Functions . . . . .	863
44.3	Fourier Inversion Formula . . . . .	865
44.4	Summary of Basic Properties of $\mathcal{F}$ and $\mathcal{F}^{-1}$ . . . . .	868
44.5	Fourier Transforms of Measures and Bochner's Theorem . . . . .	869
44.6	Supplement: Heisenberg Uncertainty Principle . . . . .	873
44.6.1	Exercises . . . . .	875
44.6.2	More Proofs of the Fourier Inversion Theorem . . . . .	876

<b>45</b>	<b>Constant Coefficient partial differential equations</b> . . . . .	879
45.1	Elliptic examples . . . . .	880
45.2	Poisson Semi-Group . . . . .	882
45.3	Heat Equation on $\mathbb{R}^n$ . . . . .	883
45.4	Wave Equation on $\mathbb{R}^n$ . . . . .	887
45.5	Elliptic Regularity . . . . .	893
45.6	Exercises . . . . .	898
<b>46</b>	<b>Elementary Generalized Functions / Distribution Theory</b> . . . . .	899
46.1	Distributions on $U \subset \mathbb{R}^n$ . . . . .	899
46.2	Examples of distributions and related computations . . . . .	900
46.3	Other classes of test functions . . . . .	908
46.4	Compactly supported distributions . . . . .	914
46.5	Tempered Distributions and the Fourier Transform . . . . .	916
46.6	Wave Equation . . . . .	924
46.7	Appendix: Topology on $C_c^\infty(U)$ . . . . .	929
<b>47</b>	<b>Convolutions involving distributions</b> . . . . .	933
47.1	Tensor Product of Distributions . . . . .	933
47.2	Elliptic Regularity . . . . .	943
47.3	Appendix: Old Proof of Theorem 47.4 . . . . .	947

---

### Part XIII An Introduction to Differentiable Manifolds

---

<b>48</b>	<b>Inverse Function Theorem and Embedded Submanifolds</b> . . . . .	955
48.1	Embedded Submanifolds . . . . .	955
48.2	Exercises . . . . .	956
48.3	Construction of Embedded Submanifolds . . . . .	957
<b>49</b>	<b>The Flow of a Vector Fields on Manifolds</b> . . . . .	959
<b>50</b>	<b>Co-Area Formula in Riemannian Geometry</b> . . . . .	963
50.0.1	Formal Proof of Theorem 50.3 . . . . .	969
50.1	Special case of the Co-area formula when $X = \mathbb{R}$ . . . . .	972
50.2	Differential Geometric Version of Co-Area Formula . . . . .	974
<b>51</b>	<b>Application of the Co-Area Formulas</b> . . . . .	977
51.1	Existence of Densities for Push Forwards of Measures . . . . .	977
51.2	Sobolev Inequalities and Isoperimetric Inequalities . . . . .	980

---

### Part XIV $L^2$ – Sobolev spaces and Pseudo Differential Operators

---

<b>52</b>	<b><math>L^2</math> – Sobolev spaces on <math>T^n</math></b> . . . . .	987
-----------	--	-----

<b>53</b>	<b><math>L^2</math> – Sobolev spaces on <math>\mathbb{R}^n</math></b> . . . . .	989
53.1	Sobolev Spaces . . . . .	989
53.2	Examples . . . . .	999
53.3	<b>Summary of operations on <math>H_{-\infty}</math></b> . . . . .	1001
53.4	Application to Differential Equations . . . . .	1004
53.4.1	Dirichlet problem . . . . .	1004
<b>54</b>	<b>Pseudo-Differential Operators on Euclidean space</b> . . . . .	1007
54.0.2	On the decay of $\partial^\alpha \langle x \rangle^s$ and $\partial_x^\alpha  x ^{2m}$ . . . . .	1007
54.1	Symbols and their operators . . . . .	1009
54.1.1	A remark on the Fourier Inversion Formula . . . . .	1009
54.2	A more general symbol class . . . . .	1011
54.2.1	Heuristics . . . . .	1012
54.2.2	The proofs . . . . .	1014
54.3	Schwartz Kernel Approach . . . . .	1021
54.4	Pseudo Differential Operators . . . . .	1027
<b>55</b>	<b>Elliptic Pseudo Differential Operators on <math>\mathbb{R}^d</math></b> . . . . .	1041
<b>56</b>	<b>Pseudo differential operators on Compact Manifolds</b> . . . . .	1047
<b>57</b>	<b>Sobolev Spaces on <math>M</math></b> . . . . .	1051
57.1	Alternate Definition of $H_k$ for $k$ -integer . . . . .	1056
57.2	Scaled Spaces . . . . .	1058
57.3	General Properties of “Scaled space” . . . . .	1059

---

### Part XV PDE Examples

---

<b>58</b>	<b>Some Examples of PDE’s</b> . . . . .	1065
58.1	Some More Geometric Examples . . . . .	1070

---

### Part XVI First Order Scalar Equations

---

<b>59</b>	<b>First Order Quasi-Linear Scalar PDE</b> . . . . .	1073
59.1	Linear Evolution Equations . . . . .	1073
59.1.1	A 1-dimensional wave equation with non-constant coefficients . . . . .	1080
59.2	General Linear First Order PDE . . . . .	1082
59.3	Quasi-Linear Equations . . . . .	1088
59.4	Distribution Solutions for Conservation Laws . . . . .	1094
59.5	Exercises . . . . .	1099

<b>60 Fully nonlinear first order PDE</b> .....	1105
60.1 An Introduction to Hamilton Jacobi Equations <small>§: 61:17</small> .....	1110
60.1.1 Solving the Hamilton Jacobi Equation <small>(60.17)</small> by characteristics .....	1110
60.1.2 The connection with the Euler Lagrange Equations .....	1111
60.2 Geometric meaning of the Legendre Transform .....	1117
<b>61 Cauchy – Kovalevskaya Theorem</b> .....	1119
61.1 PDE Cauchy Kovalevskaya Theorem .....	1124
61.2 Proof of Theorem <small>§: 62:7</small> .....	1129
61.3 Examples .....	1130

---

## Part XVII Elliptic ODE

---

<b>62 A very short introduction to generalized functions</b> .....	1135
<b>63 Elliptic Ordinary Differential Operators</b> .....	1139
63.1 Symmetric Elliptic ODE .....	1140
63.2 General Regular 2nd order elliptic ODE .....	1143
63.3 Elementary Sobolev Inequalities .....	1153
63.4 Associated Heat and Wave Equations .....	1157
63.5 Extensions to Other Boundary Conditions .....	1159
63.5.1 Dirichlet Forms Associated to $(L, D(L))$ .....	1161

---

## Part XVIII Constant Coefficient Equations

---

<b>64 Convolutions, Test Functions and Partitions of Unity</b> .....	1169
64.1 Convolution and Young's Inequalities .....	1169
64.2 Smooth Partitions of Unity .....	1180
<b>65 Poisson and Laplace's Equation</b> .....	1183
65.1 Harmonic and Subharmonic Functions .....	1189
65.2 Green's Functions .....	1199
65.3 Explicit Green's Functions and Poisson Kernels .....	1203
65.4 Green's function for Ball .....	1207
65.5 Perron's Method for solving the Dirichlet Problem .....	1212
65.6 Solving the Dirichlet Problem by Integral Equations .....	1217
<b>66 Introduction to the Spectral Theorem</b> .....	1219
66.1 Du Hammel's principle again .....	1226

<b>67 Heat Equation</b> .....	1235
67.1 Extensions of Theorem <small>§: 68:1</small> <small>§: 67:1</small> .....	1237
67.2 Representation Theorem and Regularity .....	1241
67.3 Weak Max Principles .....	1243
67.4 Non-Uniqueness of solutions to the Heat Equation .....	1249
67.5 The Heat Equation on the Circle and $\mathbb{R}$ .....	1251
<b>68 Abstract Wave Equation</b> .....	1253
68.1 Corresponding first order O.D.E. ....	1254
68.2 Du Hamel's Principle .....	1256
<b>69 Wave Equation on <math>\mathbb{R}^n</math></b> .....	1259
69.1 $n = 1$ Case .....	1260
69.1.1 Factorization method for $n = 1$ .....	1262
69.2 Solution for $n = 3$ .....	1263
69.2.1 Alternate Proof of Theorem <small>§: 70:4</small> <small>§: 69:4</small> .....	1265
69.3 Du Hamel's Principle .....	1266
69.4 Spherical Means .....	1266
69.5 Energy methods .....	1269
69.6 Wave Equation in Higher Dimensions .....	1271
69.6.1 Solution derived from the heat kernel .....	1271
69.6.2 Solution derived from the Poisson kernel .....	1272
69.7 Explain Method of descent $n = 2$ .....	1276

---

## Part XIX Sobolev Theory

---

<b>70 Sobolev Spaces</b> .....	1279
70.1 Mollifications .....	1281
70.1.1 Proof of Theorem <small>§: 71:10</small> <small>§: 70:10</small> .....	1285
70.2 Difference quotients .....	1287
70.3 Sobolev Spaces on Compact Manifolds .....	1289
70.4 Trace Theorems .....	1293
70.5 Extension Theorems .....	1298
70.6 Exercises .....	1302
<b>71 Sobolev Inequalities</b> .....	1303
71.1 Morrey's Inequality .....	1303
71.2 Rademacher's Theorem .....	1309
71.3 Gagliardo-Nirenberg-Sobolev Inequality .....	1310
71.4 Sobolev Embedding Theorems Summary .....	1316
71.5 Compactness Theorems .....	1318
71.6 Fourier Transform Method .....	1322
71.7 Other theorems along these lines .....	1323
71.8 Exercises .....	1325

---

**Part XX Variable Coefficient Equations**

---

<b>72</b>	<b>2<sup>nd</sup> order differential operators</b> .....	1329
72.1	Outline of future results .....	1333
<b>73</b>	<b>Dirichlet Forms</b> .....	1335
73.1	Basics .....	1335
<b>74</b>	<b>Unbounded operators and quadratic forms</b> .....	1339
74.1	Unbounded operator basics .....	1339
74.2	Lax-Milgram Methods .....	1341
74.3	Close, symmetric, semi-bounded quadratic forms and self-adjoint operators .....	1344
74.4	Construction of positive self-adjoint operators .....	1349
74.5	Applications to partial differential equations .....	1350
<b>75</b>	<b>Weak Solutions for Elliptic Operators</b> .....	1353
<b>76</b>	<b>Elliptic Regularity</b> .....	1357
76.1	Interior Regularity .....	1357
76.2	Boundary Regularity Theorem .....	1360
<b>77</b>	<b><math>L^2</math> – operators associated to <math>\mathcal{E}</math></b> .....	1375
77.1	Compact perturbations of the identity and the Fredholm Alternative .....	1376
77.2	Solvability of $Lu = f$ and properties of the solution .....	1378
77.3	Interior Regularity Revisited .....	1382
77.4	Classical Dirichlet Problem .....	1383
77.5	Some Non-Compact Considerations .....	1384
77.5.1	Heat Equation .....	1386
77.5.2	Wave Equation .....	1386
<b>78</b>	<b>Spectral Considerations</b> .....	1387
78.1	Growth of Eigenvalues I .....	1388

---

**Part XXI Heat Kernel Properties**

---

<b>79</b>	<b>Construction of Heat Kernels by Spectral Methods</b> .....	1395
79.1	Positivity of Dirichlet Heat Kernel by Beurling Deny Methods .....	1399
<b>80</b>	<b>Nash Type Inequalities and Their Consequences</b> .....	1401

<b>81</b>	<b>T. Coulhon Lecture Notes</b> .....	1409
81.1	Weighted Riemannian Manifolds .....	1409
81.2	Graph Setting .....	1411
81.3	Basic Inequalities .....	1412
81.4	A Scale of Inequalities .....	1415
81.5	Semi-Group Theory .....	1419

---

**Part XXII Heat Kernels on Vector Bundles**

---

<b>82</b>	<b>Heat Equation on <math>\mathbb{R}^n</math></b> .....	1425
<b>83</b>	<b>An Abstract Version of E. Levi's Argument</b> .....	1427
<b>84</b>	<b>Statement of the Main Results</b> .....	1431
84.1	The General Setup: the Heat Eq. for a Vector Bundle .....	1431
84.2	The Jacobian ( $J$ – function) .....	1432
84.3	The Approximate Heat Kernels .....	1433
84.4	The Heat Kernel and its Asymptotic Expansion .....	1434
<b>85</b>	<b>Proof of Theorems <sup>t.85.7</sup>84.7 and <sup>t.85.10</sup>84.10</b> .....	1437
85.1	Proof of Theorem <sup>t.85.7</sup> 84.7 .....	1437
85.2	Proof of Theorem <sup>t.85.10</sup> 84.10 .....	1439
<b>86</b>	<b>Properties of <math>\rho</math></b> .....	1441
86.0.1	Proof of Proposition <sup>p.87.1</sup> 86.1 .....	1442
86.0.2	On the Operator Associated to the Kernel $\rho$ .....	1443
<b>87</b>	<b>Proof of Theorem <sup>t.85.4</sup>84.4 and Corollary <sup>c.85.6</sup>84.6</b> .....	1447
87.1	Proof of Corollary <sup>c.85.6</sup> 84.6 .....	1447
87.2	Proof of Theorem <sup>t.85.4</sup> 84.4 .....	1448
<b>88</b>	<b>Appendix: Gauss' Lemma &amp; Polar Coordinates</b> .....	1453
88.1	The Laplacian of Radial Functions .....	1454
<b>89</b>	<b>The Dirac Equation a la Roe's Book</b> .....	1457
89.1	Kernel Construction .....	1460
89.2	Asymptotics by Sobolev Theory .....	1463
<b>90</b>	<b>Appendix: VanVleck Determinant Properties</b> .....	1465
90.1	Proof of Lemma <sup>t.85.3</sup> 84.3 .....	1465
90.2	Another Proof of Remark <sup>t.85.2</sup> 84.2: The Symmetry of $J(x, y)$ .....	1467
90.3	Normal Coordinates .....	1468

<b>91 Miscellaneous</b> . . . . .	1473
91.1 Jazzed up version of Proposition <a href="#">p.92.1</a> <a href="#">p.92.3</a> <a href="#">p.91.1</a> . . . . .	1473
91.1.1 Proof of Eq. <a href="#">(91.3)</a> . . . . .	1475
91.1.2 Old proof of Proposition <a href="#">p.84.1</a> <a href="#">p.83.1</a> . . . . .	1475
91.1.3 Old Stuff related to Theorem <a href="#">p.85.7</a> <a href="#">p.84.7</a> . . . . .	1479
<b>92 Remarks on Covariant Derivatives on Vector Bundles</b> . . . . .	1481
<b>93 Spin Bundle Stuff</b> . . . . .	1485
<b>94 The Case where <math>M = \mathbb{R}^n</math></b> . . . . .	1487
94.1 Formula involving $p$ . . . . .	1487
94.2 Asymptotics of a perturbed Heat Eq. on $\mathbb{R}^n$ . . . . .	1488

---

## Part XXIII PDE Extras

---

<b>95 Higher Order Elliptic Equations</b> . . . . .	1495
<b>96 Abstract Evolution Equations</b> . . . . .	1499
96.1 Basic Definitions and Examples . . . . .	1499
96.2 General Theory of Contraction Semigroups . . . . .	1502
<b>97 Solutions to Exercises</b> . . . . .	1513
97.1 Section <a href="#">p.60</a> Solutions . . . . .	1513
97.1.1 Old Exercises Solutions . . . . .	1514
97.2 Section <a href="#">p.33</a> <a href="#">p.66</a> Solutions . . . . .	1517
97.3 Section <a href="#">p.65</a> Solutions . . . . .	1519

---

## Part XXIV Old PDE Stuff

---

<b>98 Old Section Stuff</b> . . . . .	1523
98.1 Section <a href="#">p.60</a> <a href="#">p.59</a> . . . . .	1523
98.2 Section <a href="#">p.61</a> <a href="#">p.60</a> . . . . .	1525
98.3 Section <a href="#">p.62</a> <a href="#">p.61</a> . . . . .	1527
98.4 Old Section <a href="#">p.84</a> <a href="#">p.63</a> Stuff . . . . .	1528
98.5 Old Section <a href="#">p.66</a> <a href="#">p.65</a> Stuff . . . . .	1528
98.6 Old Section <a href="#">p.70</a> Now to the $n = 3$ Case: formally compute: . . . . .	1531
98.7 Probably delete the following stuff . . . . .	1535
<b>99 A Little Distribution Theory</b> . . . . .	1537
99.1 Old Section <a href="#">p.67</a> <a href="#">p.66</a> . . . . .	1538
99.1.1 Old Proof of Proposition <a href="#">p.67.8</a> <a href="#">p.66.8</a> . . . . .	1538
99.1.2 Special case of Theorem <a href="#">p.67.21</a> <a href="#">p.66.21</a> . . . . .	1540
99.2 Old Section <a href="#">p.68</a> <a href="#">p.67</a> . . . . .	1540

99.2.1 more section <a href="#">p.68</a> <a href="#">p.67</a> stuff . . . . .	1542
99.3 Section <a href="#">p.74</a> <a href="#">p.73</a> . . . . .	1545
99.4 Boundary value problems . . . . .	1549
99.5 Section <a href="#">p.77</a> <a href="#">p.76</a> . . . . .	1551
99.5.1 Summary of the Proof of Proposition <a href="#">p.77.10</a> <a href="#">p.76.10</a> . . . . .	1552
99.5.2 Old Proofs of Lemma <a href="#">p.77.12</a> <a href="#">p.76.12</a> . . . . .	1553
99.6 Old Section <a href="#">p.78</a> <a href="#">p.77</a> . . . . .	1555
99.7 More domain comments . . . . .	1555
99.8 OLD Compactness . . . . .	1557
99.9 Fourier Transform Method . . . . .	1557
99.10 Old Lax-Milgram Theorem . . . . .	1560
99.11 Old Local regularity . . . . .	1561

---

## Part XXV Gaussian Measures

---

<b>100 Infinite Dimensional Gaussian Measures</b> . . . . .	1567
100.1 Finite Dimensional Examples and Results . . . . .	1569
100.2 Density Theorems . . . . .	1572
100.3 Product measures on $\mathbb{R}^{\mathbb{N}}$ . . . . .	1575
100.4 Basic Infinite Dimensional Results . . . . .	1577
100.5 Gaussian Measure for $\ell^2$ . . . . .	1585
100.6 Classical Wiener Measure . . . . .	1589
100.7 Basic Properties Wiener Measure . . . . .	1594
100.8 The Cameron-Martin Space and Theorem . . . . .	1596
100.9 Cameron-Martin Theorem . . . . .	1599
100.10 Exercises . . . . .	1603
100.11 Gross' Abstract Wiener Spaces . . . . .	1604

---

## Part XXVI Old Unused Analysis Material

---

<b>101 Old Stuff</b> . . . . .	1615
101.1 Chapter <a href="#">p.4</a> <a href="#">p.4</a> . . . . .	1615
101.1.1 Old proofs of Tonelli's Theorem <a href="#">p.4.22</a> <a href="#">p.4.23</a> <a href="#">p.4.22</a> . . . . .	1615
101.1.2 Old Proof of theorem <a href="#">p.4.23</a> <a href="#">p.4.17</a> . . . . .	1617
101.1.3 Old Proof of Proposition <a href="#">p.4.17</a> <a href="#">p.4.17</a> . . . . .	1618
101.1.4 Old Fubini – sum . . . . .	1620
101.2 Chapter <a href="#">p.6</a> <a href="#">p.6</a> . . . . .	1621
101.3 Compactness on metric spaces . . . . .	1621
101.4 Compact Sets in $\mathbb{R}^n$ . . . . .	1624
101.5 Section <a href="#">p.8</a> <a href="#">p.8</a> . . . . .	1626
101.6 Chapter <a href="#">p.11</a> <a href="#">p.11</a> . . . . .	1627
101.6.1 Old Proof of Theorem <a href="#">p.8.27</a> <a href="#">p.8.27</a> for $d = 1$ . . . . .	1627
101.7 Old <a href="#">p.10</a> <a href="#">p.10</a> Stuff . . . . .	1628

101.8	Chapter <u>12</u>	1628
101.8.1	Old Urysohn's metrization Theorem	1628
101.9	Section <u>15</u>	1634
101.10	Section <u>18</u>	1636
101.10	Miscellaneous measurability results	1636
101.11	Section <u>20</u>	1638
101.11	Alternate proof of comment after Notation <u>p.20.2</u>	1639
101.11	Old Theorem <u>20.3</u>	1639
101.11	Z's Regularity of measures on metric spaces	1641
101.11	Old Regularity and Density Results	1644
101.11	A general regularity result	1644
101.11	Regularity of measures on metric spaces	1645
101.11	Low tech. proof of Theorem <u>23.9</u>	1649
101.11	Section <u>21</u>	1651
101.11	Section <u>22</u>	1652
101.11	Section <u>26</u>	1653
101.14	Proofs for Section <u>28</u> via orthonormal bases	1655
101.15	Section <u>30</u>	1656
101.15	Old Proof of Theorem <u>30.18</u>	1656
101.16	Section <u>24</u>	1660
101.16	Additive measures on $\mathbb{R}$	1665
101.16	More exercises	1666
101.17	Section <u>25</u>	1667
101.18	Section <u>32</u> old Stuff	1668
101.19	igned measures	1669
101.19	Old Radon-Nikodym proof	1671
101.20	The Total Variation on an Algebra by B.	1673
101.21	The Total Variation an Algebra by Z.	1675
101.22	Section <u>33</u>	1677
101.20	Old Absolute Continuity	1678
101.2A	ppendix: Absolute Continuity on an algebra by Z. (Delete?)	1678
101.20	ther Hahn Decomposition Proofs	1678
101.20	Old Dual to $L^p$ - spaces	1679
101.21	Section <u>31</u>	1682
101.22	Section <u>33.4</u>	1683
101.22	Section <u>??</u>	1685
101.30	Section <u>36</u>	1689
101.31	Section <u>37</u>	1693
101.31	Old Proof of Proposition <u>37.12</u> in the a special case	1693
101.31	Old Proof of Lemma <u>70.23</u>	1695
101.31	Part <u>18</u> of old proof of Theorem <u>37.27</u>	1695
101.32	Section <u>44</u>	1697
101.30	Old Section <u>45</u>	1698
101.33	Old proof of Proposition <u>45.5</u>	1698
101.34		1699

101.35	Section <u>70</u>	1699
101.30	Application to regularity	1699
101.30	Old Section <u>34</u>	1701
101.30	Old Section <u>74</u>	1702
101.38	An alternate proof of part of Theorem <u>74.10</u>	1702
101.38	Old Proof of Theorem <u>74.23</u>	1703
101.38	Proof of Theorem <u>74.23</u>	1704
101.30	Old Section <u>54.6</u>	1707
101.40	Old Section <u>100.6</u>	1709
101.4M	Miscellaneous Old Stuff	1710
101.41	Products with a Finite Number of Factors	1710

---

## Part XXVII Solutions to Selected Exercises

---

102	Section <u>13</u> Solutions	1739
102.1	Section <u>15</u> Solutions	1739
102.2	Section <u>16</u> Solutions	1740
103	Section <u>18</u> Solutions	1743
104	Section <u>19</u> Solutions	1745
104.1	Section <u>20</u> Solutions	1750
104.2	Section <u>21</u> Solutions	1758
104.3	Section <u>22</u> Solutions	1768
104.4	Section <u>24</u> Solutions	1770
104.5	Section <u>28</u> Solutions	1774
104.6	Section <u>32</u> Solutions	1780
104.7	Section <u>33</u> Solutions	1789
104.8	Section <u>36</u> Solutions	1793
104.8.1	Other Folland Chapter 5 problems	1809
104.9	Size of $\ell^2$ - spaces	1812
104.10	Bochner Integral Problems form chapter 5 of first edition	1813
104.11	Section <u>37</u> Solutions	1816
104.12	Section <u>44</u> Solutions	1818
104.13	Section <u>45</u> Solutions	1823
104.14	Section <u>27</u> Solutions	1824
104.15	Problems from Folland Sec. 7	1825
104.16	Folland Chapter 2 problems	1828
104.17	Folland Chapter 4 problems	1829

---

## Part XXVIII Appendices

---

- A Multinomial Theorems and Calculus Results** ..... 5
  - A.1 Multinomial Theorems and Product Rules ..... 5
  - A.2 Taylor's Theorem..... 7
  
- B Zorn's Lemma and the Hausdorff Maximal Principle** ..... 11
  
- C Nets** ..... 15
  
- References** ..... 19
  
- Index** ..... 21
