This assignment is worth 5 points. The purpose is to familiarize you with Gradescope, the software used in this course for grading homework and exams, and other course details. Complete the following steps.

1. Read the course website carefully.
2. Write a short paragraph (3-5 sentences) explaining what you think probability is.
3. Create an account with Gradescope linked to your @ucsd.edu address. If you already have a Gradescope account linked to your @ucsd.edu address, then you do not need to create another account.
4. Make sure that you provide the correct student ID (of the form Axxxxxxxx) in the corresponding field in your Gradescope account. If you fail to do so, you will be awarded 0 points for this homework. Typical mistakes are: indicating your UCSD email address in the student ID field, indicating your name in the student ID field etc.
5. Read the guide for submitting homework on Gradescope.
6. Log into your account, find the course Gradescope page, select the correct assignment, and upload your scanned assignment following the guide in the previous step. If you cannot find the course Gradescope page, then you may need a course entry code DJ6K5J.
